

Consumer Sentiment

With Google Trends

Hyunyoung Choi

Economics Team
Google Inc.

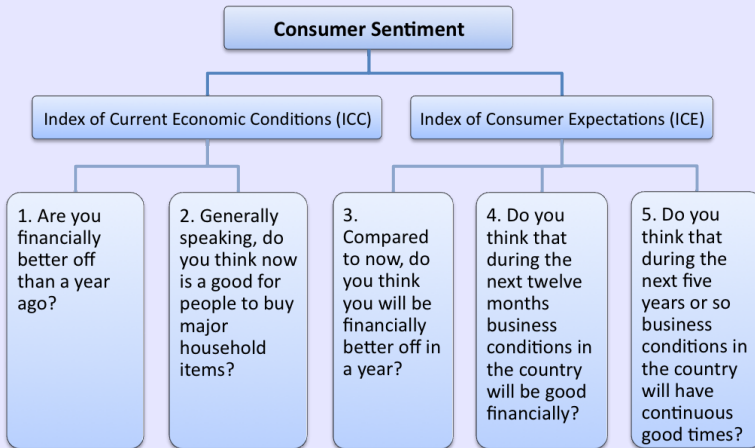

[Overview](#)

[US](#)

[UK](#)

Consumer Sentiment is based on the consumer survey.

Collect data

- Collect data from government/agent

Find highly correlated queries

- Find highly correlated queries.

Classify queries & find the search volume

- Classify queries with Google classification and find the search volume index under each category.

Find the most relevant search volume index

- Find the most relevant search volume index with the regression model selection.

Predict the index

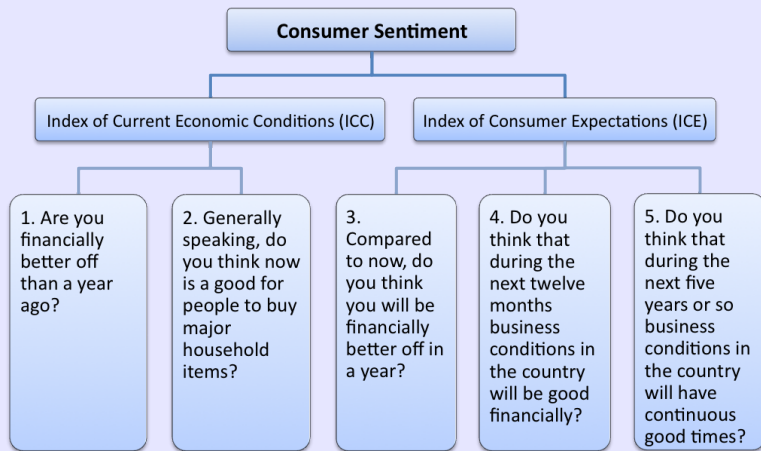

- Before the index publication, we can predict the index using the search volume index.

Disaggregate Prediction

- The search volume index can be aggregated weekly/daily or at the state level.
- Google Consumer Sentiment Index can be published weekly/daily or at the state level.

Based on the Consumers Survey

'Vehicle Brands' Search Trends by Questions

queries: 5.0 mustang magazine, chrysler pacifica, ford bronco parts, jeep cherokee, land rover discovery, land rover reviews, lexus lx470, lincoln aviator, lincoln navigator, nissan armada, toyota 4runner review, toyota four runner, trd supercharger, volvo suv, www.bmwusa.com, www.cadillac.com

Model

- Find the queries that are highly correlated to the time series for each question
- Find the vertical/subvertical for each query
- Collect search trends of the queries by each vertical
- Run a regression model (1) and find the best fit

$$Q_{i,t} = \alpha + \sum_k \beta_k \text{Google}_{i,t}^{(k)}, \quad (1)$$

where i , t and k refer to the question, the month and the subvertical respectively

- Predict the consumer confidence using the search trends
- Examine different frequencies and regions with search trends
